EXPERIENCE

FlashSpark Media, LLC Phoenix, AZ — *Owner/Engineer*
Web/Biz-Apps for small businesses

August 2019 - Current

- BizApp developer utilizing MERN stack and various 3rd-party APIs to craft applications that help businesses scale and become more efficient

DoorDash, Phoenix, Az — *Live Ops*
Real-time monitoring of high-value deliveries to ensure quality

June 2019 - February 2020

- Developed and maintained *Javascript* Chrome extension built to augment existing tooling, providing features vital to my team's unique needs.

  - **Real-time notifications of order state changes**
  - **Filtering using user-specified parameters to emphasize urgency.**
  - **Notifications of server performance degradation.**

- Developed script used to download large quantities of PDF files otherwise only accessible from individual locations.

  - **Reduction of a potential hour+ long task to a matter of minutes.**

Valid Strategy, Manhattan Beach, CA — *Contract Software Developer*

June 2018 - October 2018

- Developed automated cryptocurrency trading platform utilizing high-speed scraping and textual analysis of news sources to make trading decisions, and then execute on those decisions through the integration of multiple cryptocurrency exchange APIs.

- Helped develop a prediction model to locate 'unpublished' news articles, allowing early access to info
